INDUSTRY EXPERTISE

At Cre8tive Technology & Design we're committed to offering you world-class industry expertise that meets the needs of your market. Whether your organization needs help with sourcing raw materials, distributing final productions, identifying points of profit loss, and more, our superior staff and fine-tuned industry knowledge can help your business succeed.

OUR INDUSTRY-SPECIFIC EXPERTISE INCLUDES:

DISCRETE MANUFACTURING

When a company requires discrete manufacturing, there are several specific needs that come with the territory – often, needs that can't be met with average business models or production solutions. You need to maintain a consistently high quality product that can be delivered at a reliable rate, and you need to be able to do this all within a system that allows you to use the discrete manufacturing processes that your industry requires. Cre8tive Technology & Design provides expert integration by offering EDI support, B2B communication, subcontractor management via offshore outsourcing, as well as third party logistics. We also include support for project management, configuration, and even forecasting below the end-item.

AEROSPACE & DEFENSE

As a platinum partner with the Epicor Inspired Partner network, we're the experts when it comes to working with the A&D industry. We use quality management tools such as revision and lot/serial tracking, asset management and tooling control, contract- and project-based manufacturing, and even tools that allow you to keep on top of things like expiring materials, and excess or obsolete inventory – keeping you from purchasing items you don't need.

ENGINEER-TO-ORDER

The global nature of our economy often means that companies of all sizes need to maximize productivity and streamline all of their essential business functions. Cre8tive Technology has engineer-to-order expertise that includes project/indirect time sheets, budget views by person, royalty management, contract management, and much more.

FURNITURE & FIXTURES

In the furniture and fixture business you know important it is to be able to monitor price sensitivity, raw materials costs, labor demands and customer demands for more product options. Cre8tive Technology allows real-time order entry of style, fabric, color, and many other options alongside, inventory management and innovative marketing solutions that allow you to spend more time growing your business.

HIGH TECH & ELECTRONICS

To stay competitive in a thriving global economy, electronics and high tech development companies require innovation and efficiency. At Cre8tive Technology we are familiar with the specific needs of the electronic manufacturing industry, including 3TG metals/ROHS disclosures, lot/serial tracking, and cost management tools, and more.

INDUSTRIAL MACHINERY

When you trust our visionary network of CTND specialists to work with your industrial machinery organization, you'll find that we are familiar with engineer-to-order needs, part number and cataloging requirements, precision testing standards, and more. Your solution will address the fluctuation of raw material costs and the complexities of engineer-to-order production.

MEDICAL DEVICES

As a company that produces devices that must meet a very specific range of criteria and adhere to strict regulations, medical device manufacturing companies require manufacturing solutions that can keep up with those demands. More than that, you also need to be able to provide this technology on a regular, reliable schedule that your buyers can count on. And that's where Cre8tive Technology comes in. In addition to understanding research and development project management requirements, we are also aware of the medical industry need for revisions, lot and serial tracking, automated processes, service and repair features, and built in FDA (as well as EU support) validation.

PROFESSIONAL SERVICES

As a business owner, you're likely already familiar with the five key service-centric processes used by most companies in the industry: winning the business, staffing projects effectively, managing engagement delivery, streamlining financial obligations, and analyzing business performance. At Cre8tive Technology, we leverage industry expertise like no other company can, as we actually use our professional services knowledge to run our own organization. From project and resource management to scheduling and even time approvals, our expertise can simplify your workplace.

INDUSTRY SOLUTIONS

CRE8TIVE A&D

Keeping up with industry changes and regulations is a large part of production for the aerospace and defense industry. Since models, parts, requirements, and technology are constantly changing, staying on top of rigorous deadlines and narrow budgets can be difficult. In other words, you need a solution that can keep production running smoothly, efficiently, and without error. Whether you're working with the government or with private contractors, as the industry experts in Epicor ERP for the aerospace and defense industry, we can provide the solutions you need.

CRE8TIVE PROJECTS

When you run a projects-based company, your manufacturing needs set you apart from other kinds of production companies. Armed with Epicor ERP solutions and project-based expertise, Cre8tive Technology can custom craft an Epicor solution that suits your company's specific needs. Whether your needs involve enhanced project entry features or additional description fields that allow your project management software to do what it does better in larger, more complicated projects, our solutions make project management that much simpler.

CRE8TIVE PSA

At Cre8tive Technology we don't just promote Epicor ERP or professional organizations, we actually use it ourselves. As such, you can be confident that we're constantly updating our systems to account for the latest industry-specific standards, and are always working on enhancing our project management abilities to make our solutions faster and more efficient. If you're a U.S. based company with a focus on professional service, Cre8tive Technology has the expertise necessary to custom craft an Epicor ERP solution for your firm.

WHAT OUR CUSTOMERS ARE SAYING...

Leisa McCollister

PRODUCT MARKETING AND ERP IMPLEMENTATION PROJECT MANAGER | OW LEE

“Once we implemented Epicor ERP we immediately benefitted from better visibility and real-time access to information – the system is very intuitive and easy to navigate.”

Skip Butler

DIRECTOR OF OPERATIONS | KINEMATIC AUTOMATION, INC.

“In the past, launching a sales order required multiple touches from various departments and it was days before we were buying the necessary parts. Today that cycle time has decreased by more than 90 percent – from an average of three days’ time to two hours.”

Eric Zuercher

VP OF ENGINEERING | AGM CONTAINER CONTROLS

“Cre8tive Technology and Design provided us with consulting services for the implementation of our Epicor ERP system. Their team guided us through every step of the process, and helped us to understand where we could modify our internal processes to match Epicor functionality and improve our efficiency.”
